# S SWATCOM Multicom3

The SWATCOM Multicom3 is an easy to use full-duplex, portable, hands-free multi-user wireless intercom, that allows natural conversation between multiple users. This team communications system is an ideal solution for any setting where helmets or bump caps are worn.

# SWATCOM Multicom3

## DESCRIPTION

Duplex communication is a method of communication where information can be transmitted and received simultaneously in both directions. This means that two or more devices can send and receive data at the same time, allowing for real-time communication between them.

■ The Multicom3 can transmit clear concise communications over distances up to 400m helped by being worn on the head which gives improved range and has 8 hours battery life. The SWATCOM Multicom3 system can be configured to work in most environments. Due to its adaptability, it can be combined with numerous different industrial or non-industrial headset types enabling it to work in a variety of work places. **Helmet attachment clip needs to be purchased separately.**
